Product details

Profile system	ISB
Slot type	8
Material	Zinkspuitwerk
Thread diameter [mm]	M8
Finish	Elektrolytisch verzinkt
HS-code	73269098

Description

With this universal connector you join two ISB profiles with slot 8 at a right angle, for example a cross member against an upright. The connector sits in a bore in the first profile; the button head screw runs through it into the T-slot nut in the slot of the second profile. You tighten it with a hex key through the bore, so the connection is hidden inside the frame and can be released again at any time.

- For ISB profiles with slot 8, 40 series
- Set: 1 universal connector, 1 T-slot nut slot 8 M8, 1 button head screw ISO 7380 M8x30
- Material: zinc die-cast, zinc plated
- Connector Ø19.7 mm
- Machining: a bore Ø20 mm in the first profile, 20 mm from its end
