Product details

Product series	S400B HEAVY
Footplate diameter [mm]	105

Description

This stainless steel floor-mounted leveling foot features a fully machined base with a diameter of 105 mm and an enclosed spindle M12, M16, M20, M24, M30, or M36. The total height of this leveling foot is 177.5 to 287.5 mm with a maximum load capacity of 12,000, 30,000, 45,000, 70,000, 100,000, or 120,000 N. It is ideally suited for industrial environments where a high level of hygiene and heavy loads are required, such as in the food, chemical, and pharmaceutical sectors. The stainless steel base and its distinctive shape guarantee high load resistance and excellent cleanability, even in critical conditions. The protected spindle prevents the threaded section from being exposed to external substances.
