Product details

Profile system	NRB
Finish	Gepoedercoat
HS-code	8301.50.00.00

Description

A compact slam latch to latch and lock doors and flaps. It needs no drilling or other machining: you screw it on from the front, for example with T-slot nuts on an aluminium profile.

The symmetrical design works on doors hinged left or right. While the latch is locked, its cover caps cannot be removed, so it cannot be taken apart.

- Housing: aluminium die-cast, powder coated in aluminium colour
- Universal lock: one key opens all latches with this lock
- Fastening: M6 socket head or pan head screws, from the front
