Product details

Compatible system	ConveyorBricks
Material	Aluminium
Finish	Geanodiseerd
Color	Zwart
HS-code	7604 29 90 90

Description

This ConveyorBricks Side Guide Curve Profile with an inside lane radius of 825 mm and an angle of 30° is designed for creating curved side-guide sections within modular conveyor layouts. It enables machine builders and system integrators to configure conveyor curves using the ConveyorBricks modular building concept. Available in different radii and curve angles, these profiles offer flexibility when designing conveyor layouts to suit specific installation requirements. Part of the ConveyorBricks modular building concept by Bendur, designed to give system integrators flexibility in configuring conveyor components. Standard where possible. Flexibility where needed.
