Product details

HS-code	7307.99.10.90

Specifications

Thread	M10
Surface treatment	Zinc plated

Description

These pipe plugs, with a diameter of 20 mm and right-handed thread (M10), form strong connections with Ø22x1mm pipes. The pipe is clamped around the plug using a crimping tool, resulting in a secure connection. Ideal for various applications, such as connecting pipes or as a pull or push rod. Often used in warehouses for suspending conveyor belts at great heights or as a bracing structure for extra rigidity. This method makes it easy to cut pipes to size on-site without complex preparation.
