Product details

Product series	LOGISTICS / MANUFACTURING / AUTOMOTIVE
Wheel diameter [mm]	160
Overall height [mm]	200
Wheel width [mm]	40
Size of plate [mm]	140 x 110
Plate hole centres [mm]	105 x 80/75
Plate hole [mm]	11
HS-code	8302.20.00.90

Description

This heavy-duty swivel castor from the HL series turns on double, hardened ball races with a dust-sealed swivel bearing and a grease nipple. The fork is extra heavy pressed steel, zinc-plated and chromated, with a bolted axle; the wheel runs on a plain bearing. Its full brake locks the castor completely when you need it to stay put.

The injected polyurethane tread suits temperatures from -40 °C to 80 °C. You fix the castor with standard screws through the 140 x 110 mm screw-on plate.

- Wheel: Ø160 mm, 40 mm wide, polyamide centre

- Overall height: 200 mm
- Load capacity: 400 kg dynamic, 800 kg static
- Fixing: screw-on plate 140 x 110 mm, holes Ø11 mm
- Swivel circle: Ø300 mm, brake included
